Summary

Software engineer from Dublin, Ireland, with 12 years of experience. Comfortable working across the whole stack, in any language or framework, with expert-level React and TypeScript. A proponent of AI-first engineering, multiplying productivity with LLM-assisted workflows. Spent the past five years building and maintaining features for a product that reaches more than a million visitors a day.

Experience

Senior Software Engineer, Canva (Pexels) – Remote, Dublin Apr 2021 – Nov 2026

Canva's free stock photo and video platform with more than 1M visitors per day. Senior software engineer with a frontend focus, working full-stack across web, backend, mobile and data.

- Led the 2025 programme moving Pexels users into Canva's editor, ten initiatives from scoping to readout: daily click-throughs to Canva up 79%, monthly sign-ups to Canva up 200%.
- Designed and built the in-house A/B testing platform: every web experiment since 2023 runs on it.
- Designed and led the development of The Level Up, Pexels' first photography course: Rails models and API, React frontend, and an automated caption pipeline with Whisper.
- Made AI-assisted engineering a team capability: shared knowledge with the team; designed an agent configuration adopted across Pexels repositories; coached the designer to his first PR.

Lead Front End Engineer, Wia – Dublin Mar 2018 – Mar 2021

Internet of Things platform startup. Lead frontend engineer, owning the Angular web application from architecture to release.

- Built a drag-and-drop code editor for beginners to program their own IoT devices: custom blocks generating Arduino code in real time, compiled and deployed from the browser.
- Built the Space Designer, where users could upload a floor plan and draw out zones to measure on an HTML canvas, and an occupancy analytics dashboard to track occupancy in real time.

Front End Web Developer, USIT – Dublin Apr 2015 – Mar 2018

Ireland's student travel and work-abroad company. In-house frontend developer for its public sites, campaign pages and booking journeys.

- Designed and built the web pages behind hundreds of adventure-tour packages, with an interactive itinerary map on Mapbox GL.

Web Developer and Designer, Freelance – Dublin Jun 2014 – Apr 2015

- Web development, UI design and branding for a range of clients, after a developer and designer internship at Plugmedia (front-end UI, branding, Joomla, PHP).

Audio Engineer and Producer, Freelance, then Aria Mastering – Dublin Jan 2011 – Mar 2014

- Audio engineer and music producer in Dublin recording studios, then ran an online mastering business from a home studio.

Skills

Languages: TypeScript, JavaScript, Ruby (Rails), HTML, CSS, SCSS

Frontend: React, Next.js, Angular

Mobile and backend: React Native, App Store and Play Store releases, Ruby on Rails, MySQL, Braze

Data and experimentation: A/B testing, experiment readouts, Snowplow/Snowflake, Mode

Platform and quality: Cloudflare Workers, Kubernetes, Jest, Sentry, AppSignal, Datadog, Smartling localisation

Workflow: AI-assisted development (Cursor, Claude Code), MCP servers, agent configuration, spec-first builds

Delivery: End-to-end ownership of cross-functional programmes (scoping to delivery), estimation, delegation, technical writing (design docs, runbooks, post-incident reviews), mentoring

Education

Sound Training Centre, Diploma in Sound Engineering and Music Production 2010 – 2012
